

1. Which one is the biggest? bowl
2. Which one is the smallest? box
3. How many cups does each one hold:
bucket 20 cups
box 4 cups
bowl 22 cups
4. How many more cups of milk goes in the bucket than in the box?
 $20 - 4 = 16$. 16 more cups.
5. How many less cups of milk goes in the bucket than in the bowl?
 $22 - 20 = 2$. 2 less cups.
6. If you use the box the fill the bucket, how many boxes of milk do you pour in before it is full? (use repeated adding)
 $4 + 4 \rightarrow 8 + 4 \rightarrow 12 + 4 \rightarrow 16 + 4 = 20$. 5 boxes of milk.
7. If you pour 1 bucket of milk into the bowl, how many cups of milk must you add before it is full? $22 - 20 = 2$. 2 cups.
