QUESTION 3:

3.1) Birth can be restricted by applying the following:

- A man can use a condom which will prevent the sperm cell of penetrating the woman and fertilizing the egg cell. It is the most trustworthy birth control for a man.
- The woman can drink an oral contraceptive daily to prevent pregnancy. Ovulation is stopped by the pill.
- A woman can use a cover over the cervix; this prevents the sperm cell from reaching the womb.
- The man and woman can abstain from sex when ovulation is taking place.
