

NO CALCULATOR MAY BE USED IN THIS EXERCISE!

(1) Write the additive inverse of each of the following:

(a) 0,8

(b) -44

(c) $1\frac{1}{2}$

(2) Calculate the value of the following if $A = \frac{3}{5}$; $B = -0,7$ and $C = 0,125$:

(a) A^2C

(b) $B - C$

(c) $\sqrt[3]{C}$

[illegible]

(3) There are four balls in a bag. On each ball a number is written:

White $\rightarrow \frac{7}{16}$

- Which ball has the lowest value?
- Calculate the sum of the values on the blue and the white balls.
- Which ball is not a proper fraction?

[illegible]

(4) Use a ✓ to indicate the applicable column(s) for each number:

		N	N ₀	Z	Q	R
(a)	3,412 ...					
(b)	113					
(c)	$\frac{3}{7}$					

(5) Calculate: $\frac{\frac{3}{4} + \frac{3}{6}}{1\frac{1}{8} - 2\frac{1}{4}}$
